MS140
MULTISYSTEM

MS140 MULTISYSTEM

The MS140 is a unique tool: it's the biggest Multisystem on the market, fitting excavators from 120 to 160 tons. Three different jaw kits are available to be applied to the main machine body, transforming the tool in a concrete crusher or in a metal-cutting shear as well. By using the special crusher kit, the MS140 is able to release even more power on concrete.

- A **double guide** on each side keeps the jaws in **perfect alignment**.
- The **sturdy rotation** allows accurate positioning of the attachment in any working environment and in **complete safety**.
- The **patented Speed Valve** allows faster cycle times (opening/closing), **improving productivity**. It also protects the hydraulic circuit from pressure peaks.
- The **Crusher Jaws kit** has a 2500 mm opening and is equipped with rebar cutting blades.
- The **Special Crusher Jaws kit** has been specially designed to **increase breaking forces by 25%**. No rebar cutting blades are provided.
- The **Shear Jaws Kit** is designed for top - performances in metal structure demolition and scrap processing.

TECHNICAL DATA

BT.MS140.00

RIF. 97878-140/E 12/18 REV.00

MODEL		MS140
EXCAVATOR WEIGHT	t	120-160
TOOL WEIGHT *	kg	14000
OPENING CRUSHER JAWS	mm	2500
OPENING SPECIAL CRUSHER JAWS	mm	2300
OPENING SHEAR JAWS	mm	1150

We are constantly improving our products and therefore we reserve the right to change the design and technical specifications without prior notice.
* Tool weight does include Mantovanibenne top bracket.
